Masai habitat (वास स्थान) remains **East Africa**. Do not “update” it to West Africa.

N.0 Framework (map first)

The Constitution does **not** define “tribe” in a detailed article. **Article 342** lets the President notify Scheduled Tribes for each State or Union Territory, after consulting the Governor in a State. **Parliament** may later include or exclude communities by law. ST lists are therefore **state-specific**. A community that is Scheduled Tribe in one State may not be listed in another.

Where tribal communities live

Tribal communities concentrate in **forest, hill and plateau** belts. Isolation and forest dependence shaped distinct cultures there.

Four (चातुर्याम) belts hold most of India's Scheduled Tribe population.

The **North-Eastern hills** have a very high tribal share of the local population.

The **central Indian plateau** (Chotanagpur (छोटानागपुर), Bastar, Satpura (सतपुड़ा) and adjoining forests) is the largest heartland by numbers.

Western India has the Bhil country of Rajasthan, Gujarat, Madhya Pradesh and Maharashtra.

The **Andaman and Nicobar Islands** have small, isolated island communities.

According to **Census 2011**, Scheduled Tribes are about **8.6%** of India's population.

Madhya Pradesh has the largest ST population among the States.

The **Bhil** are among India's largest tribal groups.

The **Gond** are another of the largest groups.

The **Santhal** (संथाल) are a major eastern group.

Lokur Committee (identification criteria)

ST identification has used five pairs associated with the **Lokur Committee**: primitive traits, distinctive culture, geographical isolation, shyness of contact with the wider community, and economic backwardness.

These are **administrative identification criteria**. They are **not** a definition written into the Constitution.

Particularly Vulnerable Tribal Groups (PVTG)

The **Dhebar Commission (1973)** identified **Primitive Tribal Groups (PTGs)** as the least developed among tribes.

In **2006** the Government renamed them **Particularly Vulnerable Tribal Groups (PVTGs)**.

There are **75** PVTGs across **18 States** and the **Andaman & Nicobar Islands**.

Identification of a PVTG uses four pairs: pre-agricultural technology, a stagnant or declining population, extremely low literacy, and a subsistence-level economy.

Odisha has the highest number of PVTG communities.

PM-JANMAN is the outreach mission for PVTG habitations. It targets housing, roads, water, education and health connectivity.

Schedules and forest rights

The **Fifth Schedule** covers administration of Scheduled Areas and Scheduled Tribes in many States.

The **Sixth Schedule** covers autonomous tribal areas in **Assam, Meghalaya, Tripura and Mizoram**.

The **Forest Rights Act, 2006** recognises forest rights of forest-dwelling Scheduled Tribes and other traditional forest dwellers.

Uttar Pradesh has a **low** Scheduled Tribe share. Census 2011 put it at about **0.6%** of the State population (roughly 11 lakh people). The still tests a **fixed notified list**.

Two geographic clusters matter.

The **Vindhyan / Sonbhadra south** holds Gond, Kharwar, Chero, Baiga, Agariya and related groups.

The classic five names that still appear are **Tharu, Bhotia, Buksa, Jaunsari and Raji**.

Uttar Pradesh's PVTG pair is **Buksa and Raji**.

The **Constitution (Scheduled Tribes) Order (Amendment) Act, 2003** added many **district-limited** groups. For those entries, ST status applies **only in the named districts**.

Kuki is not a Uttar Pradesh tribe. Kuki groups live in the North-East.
