N.0 Framework — World Regional Geography

Identity: This is a **political + regional map** chapter. Capitals, "which is NOT in the region", landlocked status, equator crossings, and a few physical facts inside each belt all live here.

Fact **capital ≠ famous city**.

Ankara, Canberra, Brasília and Abu Dhabi are the classic traps.

Fact **landlocked** and **equator** lists separately from the world rivers and world landforms chapters.

Boundary lines such as the 38th, 49th, Durand, Radcliffe and McMahon are short map diet here.

Full political-map drill also lives in the Political Map chapter.
